

Case Study: AzureMetrics Indicator

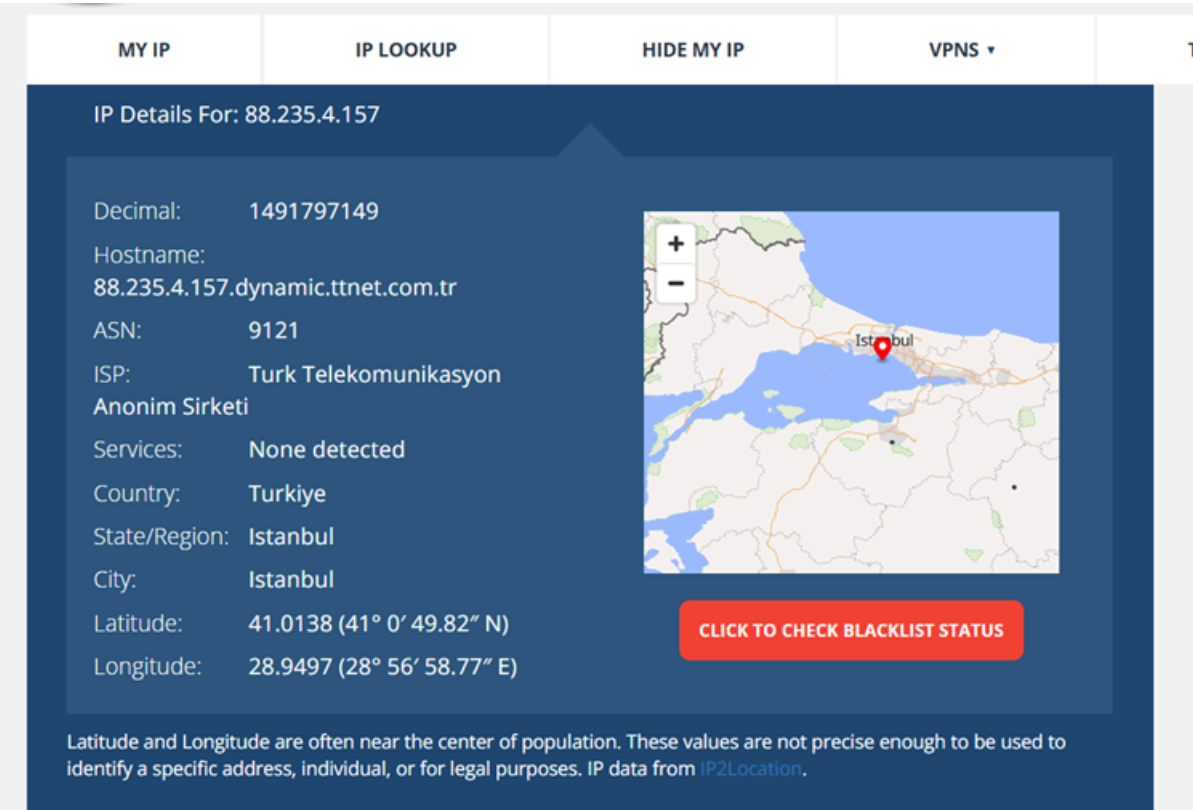

Alert: Observed Automated Detection: AzureMetrics Indicator Observed

Source: Microsoft Sentinel

Description: An automated detection alert was generated after Azure monitoring identified suspicious AzureMetrics activity. The alert indicates unusual metric patterns or resource behavior that may be associated with unauthorized access, resource abuse, configuration changes, or abnormal workload activity within the Azure environment.

Severity: High

Triggered Rules: Suspicious AzureMetrics Activity Detected

The screenshot displays an IP lookup interface with a dark blue background. At the top, there are navigation tabs: "MY IP", "IP LOOKUP" (selected), "HIDE MY IP", "VPNS", and "TI". Below the tabs, the text "IP Details For: 88.235.4.157" is shown. A list of IP details is provided on the left, and a map of Turkey with a red pin in Istanbul is on the right. A red button labeled "CLICK TO CHECK BLACKLIST STATUS" is located below the map. At the bottom, a disclaimer states: "Latitude and Longitude are often near the center of population. These values are not precise enough to be used to identify a specific address, individual, or for legal purposes. IP data from IP2Location."

Field	Value
Decimal	1491797149
Hostname	88.235.4.157.dynamic.ttnet.com.tr
ASN	9121
ISP	Turk Telekomunikasyon Anonim Sirketi
Services	None detected
Country	Turkiye
State/Region	Istanbul
City	Istanbul
Latitude	41.0138 (41° 0' 49.82" N)
Longitude	28.9497 (28° 56' 58.77" E)

Alert ID: 3898

Time : 7/6/2026,10:02:51 PM

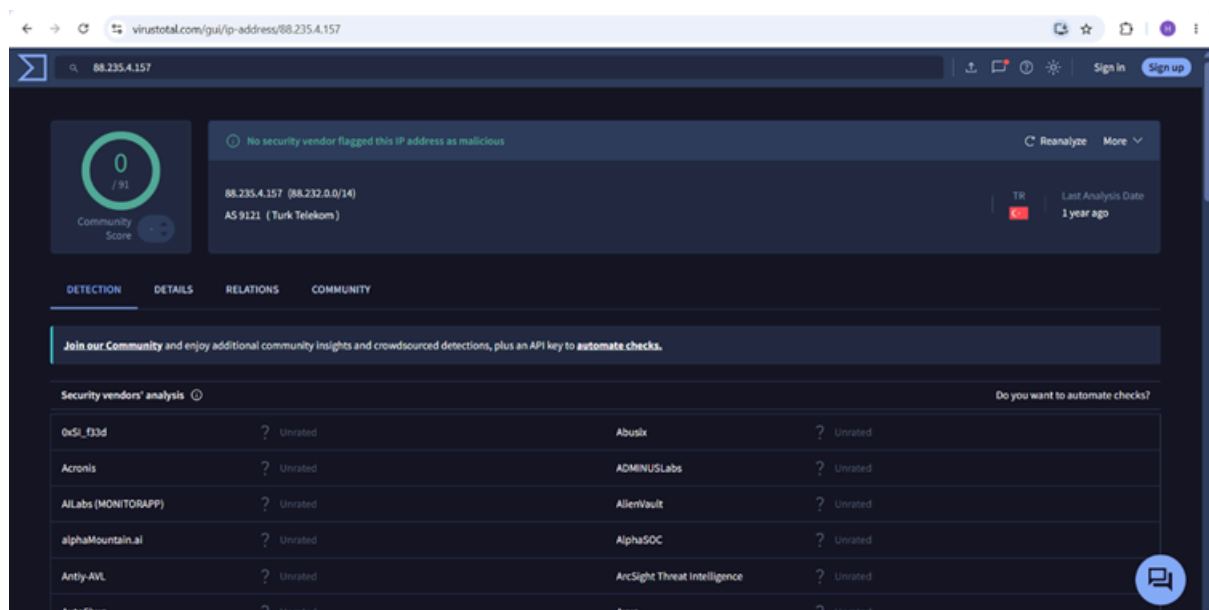

Source ip: 88.235.4.157

Destination ip: 10.0.121.160

Service : Azure Monitor / AzureMetrics

User: TT Administrative Contact Role

Failed attempts : 0

Validity : False Positive

- Based on the available VirusTotal intelligence, the IP address **88.235.4.157** is **not currently classified as malicious**. There is **no reputation-based evidence** to support that this IOC is associated with malicious activity. If internal logs also show no suspicious behavior (such as repeated failed logins, exploitation attempts, or unusual outbound connections), the alert can be **closed as a False Positive**.
